ATTENTION! This indication alerts you to the fact that ignoring the contents described herein may negatively affect product performance and functionality.

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

STEP 2 Test fit the accent to the fuel door. Line up the hole in the accent with the key lock area on the fuel door. Make any temporary markings to use as a guide for installation.

NOTE Make sure these markings are light and removable after the accent is installed.

STEP 3 Clean the mounting area thoroughly with the supplied alcohol pad. Kuryakyn suggests removing the warning sticker on the lower portion of the fuel door to ensure proper adhesion of the accent (Pic 1)

NOTE The accent will partially cover the warning sticker and may affect the mounting of the accent.

ATTENTION! Ensure the area of installation is free of grease, oil, dirt or other debris to ensure proper adhesion. Kuryakyn WILL NOT issue a warranty on any parts lost due to improper installation.

STEP 4 Rub the tape backing on the accent to activate the adhesive.

STEP 5 Remove the tape backing and apply the accent to the fuel door. Reference any markings made in Step 2.

STEP 6 Hold accent in place for 1 minute. Full bonding will occur in 24 hours.

ATTENTION! The adhesive will not bond correctly if applied at temperatures less than 50°F. Do not attempt this installation in temperatures less than 50°F.
